# Tri-Glide Air Ride

## SMOOTH CRUISING FOR TRIKES

**T**hose Tri-Glide Harleys are getting popular. In any pack of riders it seems a couple of them are going to be on the trikes. But if any Harley could use some help in the suspension department it's those new three-wheelers. Legend Air Suspensions has it, and it's available now.

The LTR108-B Suspension Kit for the Harley-Davidson Tri-Glide puts total adjustability, and the smoothest, safest ride, right at a trike-rider's fingertips. Those Tri-Glides come with one OE suspension setup and it

has to do it all, one-up cruising, two-up touring, packed heavy or just running light around town. That's asking a lot. And all those riders have their own idea of what's the perfect setup for them, the ride quality for their needs. Easy adjustability is the key here and Legend Suspensions puts that instant control right at their fingertips. With the LTR108-B Suspension Kit those trike riders can get the smoothest, safest ride available no matter what the road conditions are or how small or large the payload.

Increasing or decreasing the spring rates to fit the

situation is essential here.

With the Legend Suspensions system that happens with one push of a handlebar-mounted control button. Presto, the spring rates are instantly adjusted to the desired ride quality. Legend's LTR108-B air-ride can tame any road or load and it'll do it for the life of that Tri-Glide. Everything needed for an easy installation is included and it's all a direct bolt-on. Even the wiring is color-coded. The Tri-Glide kit features Legend Suspensions' exclusive Kevlar Air Spring Technology with Deflective Disc Damping and there's an on-board Thomas

Air Compressor for quick and easy on-the-go adjustments. The smoothest ride can be dialed in anywhere, anytime, and it all happens at the push of a button. It's all guaranteed to perform, it's made right here in the USA and comes with the Legend Air Suspensions exclusive Lifetime Warranty.

Trikes are popular. Trikes also need some help. The Legend Suspensions LTR108-B Suspension Kit for the Tri-Glide, the latest kit from the originators and innovators of adjustable air-ride suspension, is available now from Drag Specialties. ■
